ENHANCE THE LIFESPAN OF YOUR MACHINES

ELIXIR®

NEW

ENHANCE THE LIFESPAN OF YOUR MACHINES

PASSION TO PERFORM

MPFILTRI®
Lighter, easier to use, and kinder to the environment - MP Filtri’s new **ELIXIR** low pressure concept filters have been specially designed for in-line connections and to handle working pressures up to 1,6MPa (16 bar).

The concept is now available in three new series:

- **SFEX SERIES** - Suction
- **RFEX SERIES** - Return
- **LFEX SERIES** - Delivery, which is equipped with differential indicator (electrical or visual)

Available in 4 sizes: 060, 080, 110, and 160, the new generation of filters is completely interchangeable with the previous MPS 050/070/100/150 series of the Spin-on range.

The new cast aluminium head and nylon design reduces weight by 10 per cent compared to the Spin-on range.

Less waste reduces both your carbon footprint and protects the environment. Replacement is fast and easy, just disassemble the bowl with an adjustable wrench, take out the **FEX** filter and replace.

**Applications**

- **Agriculture**
  - Specially designed for all agricultural applications
- **Mobile**
  - Ideally suited for the **CONSTRUCTION** sector
- **Industrial**
  - Fully compatible with the **COMPRESSORS** sector
- **Transmission**
  - SFEX suction filters meet the key industry standards and benchmarks
The Spin-on disposal includes different components: metal flange, seals, metal bowl, residual oil and metal spring. The FEX disposal - the ELIXIR filter element - includes simply the element itself. Kinder to the environment by reducing the amount of waste!

Fast, simple disassembly system. Created for use with an adjustable wrench - not by chain wrench or by strap wrench.

High flow rate thanks to the box geometry: the oil enters in the filter element in a spiral flow and spreads more effectively inside the filter element for greater longevity.

Reduction in oil waste when replacing the filter element.
